11:30 – 13:00

How Can We Advance Research on Obesity Prevention During Infancy?

The first year of life may be one of the most promising windows of opportunity for preventing obesity and establishing a healthy weight for life. Join others interested in this topic during an interactive session where you can

1. Learn more about the evidence related to this critical period of development
2. Discuss your own experience / research in this field
3. Identify priority areas for further research
4. Meet other potential research collaborators

Everyone welcome! Contact ilona.hale@alumni.ubc.ca for more information.
