

Join the Obesity Canada GTA Chapter (OC-GTA) for a fascinating look at the correlation between fatty liver and obesity - and how to diagnose and manage patients who develop NAFLD and NASH.

Hear from a patient who experienced significant liver damage when his weight reached 325 lbs. He will share his weight loss journey through changes in diet and lifestyle, and the impact this has had on his diagnosis.

When:

Tuesday, March 10, 2020 at 6:00pm

Where:

Living Arts Centre (Mississauga)

Bank of Montreal Room

Refreshments will be provided
